

Astro Society, a web3 start-up company, is set to launch Astroverse, the first NFT display app. Astroverse allows users to display their NFT collections on multiple screens in real life, bringing new dimensions to the NFT space and making it easy for users to enjoy their collections.

“Astroverse is a game-changer for the NFT space,” said Draghici Radu Alin, CEO of Astro Society. “With its unique features, Astroverse makes it easy for users to experience their NFT collections in real life and connect with other NFT enthusiasts. We are excited to see how the app will drive more people into web3 and the NFT space.”

velopment of Astroverse and build a core community, Astro Society is launching Trippers, a 9000-piece NFT collection. The private mint for Trippers is now live, and the private sale will begin on December 20. Tripper holders will be beta testers for Astroverse and will have free lifetime access to the app. Don't miss out on this exclusive sale! For more details, check out Twitter.

In addition to the NFT display feature, Astroverse will also include other innovative features such as NFT lending, screen time rewards, and an all-in-one social media platform. These features will allow users to monetize their NFT collections and easily connect with other NFT enthusiasts.

Astro Society is a registered business in Europe and is led by CEO Draghici Radu Alin. The team includes a designer with 10 years of experience in design and marketing, an app developer with 6+ years of experience in mobile app

design and development, a smart contract developer with experience on multiple NFT projects, and marketing and SEO specialists. The team also has a business advisor and a legal advisor to provide guidance on business and legal matters.
